#### 5. PERFORMANCE SUMMARY

##### Financial Performance Summary

As at December 31, 2020, the Trust's assets totaled \$9,005,555, decreasing from \$10,628,934 as at December 31, 2019 primarily due to impairment recognized on property inventory and property inventory sale during the year, although the decrease was offset by an increase in cash. Liabilities totaled \$880,822 as at December 31, 2020, decreasing from \$1,936,665 as at December 31, 2019 due to decreases in loans received from related parties (section 15), deferred revenue related to the sale of 13 lots at Garrison Landing, and accounts payable and accrued liabilities.

The Trust earned a net operating income of \$18,030 during the year ended December 31, 2020, compared to a net operating loss of \$66,278 for the year ended December 31, 2019. The change from net operating loss to net operating income is because the sales in 2020 generated profits while sale in 2019 resulted in losses. There were 2 sales in 2020 which generated profits while there was only one sale in 2019 which resulted in a loss: 13 lots at Garrison were sold in January 2020 for \$1,236,958, the related costs were \$1,176,389, thus producing a small profit of \$60,569; the additional lot sold in November 2020 at Garrison was sold at \$95,000; it produced a profit of \$1,518, after related costs of \$93,481.

The Trust incurred a net loss of \$496,016 after finance expense, other expenses and its share of the loss of equity-accounted investments for the year ended December 31, 2020, compared to a net loss of \$3,710,368 for the year ended December 31, 2019. The significant decrease in net loss is primarily due to the Trust having 2 sales during 2020 which generated profits while there was 1 sale in 2019 which resulted in a loss. In addition, there was a significant impairment recognized on property inventory during 2019 while there was a much smaller impairment during 2020. Also, general and administrative expenses were less during 2020 compared to 2019 and therefore contributed to a smaller net loss.

Total liabilities increased primarily due to loans received from related parties and outstanding asset management fees. Unitholders' equity decreased due to the net loss incurred during the quarter.

## **6. RESULTS OF QUARTERLY OPERATIONS (CONTINUED)**

The Trust earned sales revenue of \$95,000 and incurred a net operating loss of \$8,951 during the three months ended December 31, 2020 compared to sales revenue of \$99,500 and a net operating loss of \$21,736, during the three months ended December 31, 2019. The change was due to the 2019 sale of one lot at Garrison Landing resulted at a loss of \$7,687 and incurring property tax expenses, while the 2020 sale resulted in a profit of \$1,519 and incurring lower property taxes due to less lots because the Trust sold 13 lots in January 2020. The Trust incurred net finance expense of \$152 during the three months ended December 31, 2020 compared to net finance expense of \$12,650 during the three months ended December 31, 2019. The decrease was primarily due to the elimination of mortgage interest because the mortgage on WCPG VII LP was repaid in full as at December 31, 2019. The Trust's equity-accounted investments incurred a loss of \$14,268 during the three months ended December 31, 2020 compared to a loss of \$156,282 during the three months ended December 31, 2019. The decrease in loss was primarily due to no impairment recognized on the BCR Lands in 2020.

The Trust incurred a loss attributable to the Trust unitholders of \$274,199 during the three months ended December 31, 2020 compared to a loss attributable to the Trust unitholders of \$2,326,544 during the three months ended December 31, 2019. The decrease in loss attributable to the Trust unitholders was primarily due to lower impairment recognized on property inventory, the decrease in interest income, and the decrease in loss from equity-accounted investments.

## **7. DEBENTURES**

On July 31, 2018, the Master LP issued debentures ("2018 debentures") totaling \$6,500 to settle outstanding Trust unit redemption requests in excess of its limit on cash payments for such redemptions (section 13). The debentures are subordinated, unsecured, will mature in July 2023 and pay interest monthly in arrears at an annual interest rate of 2.19%. The Master LP may repay the debentures at any time.

On April 30, 2020, the Master LP issued debentures ("2020 debentures") totaling \$37,000 to settle outstanding trust unit redemption requests in excess of its limit on cash payments for such redemptions (section 13). The debentures are subordinated, unsecured, will mature in April 2025 and pay interest monthly in arrears at an annual interest rate of 0.375%. The Master LP may repay the debentures at any time.

The debentures are recorded at amortized cost. The carrying value of the debentures on December 31, 2020 was \$41,514 (December 31, 2019 – \$4,464). Included in the debentures are the related unamortized debenture transaction costs of \$1,986 as at December 31, 2020 (December 31, 2019 – \$2,036), which are amortized over the term of the debentures using the effective interest rate method. The 2018 debentures bear an effective interest rate of 13.22% as at December 31, 2020 (December 31, 2019 – 13.22%), and the 2020 debentures bear an effective interest rate of 0.64% (December 31, 2019 – nil%). During the year ended December 31, 2020, the Trust incurred debenture interest of \$774 (year ended December 31, 2019 – \$560).

## 8. LIQUIDITY

The Trust has financed its operations to date through related party loans and disposal of property inventories and investment properties that it acquired since the Trust's inception.

Each investment property acquired in the portfolio is purchased with the expectation that it will generate sufficient cash flows to finance its own operating costs. Each development property acquired in the portfolio is purchased with the expectation that it will generate a return in addition to what could be realized from underlying investment properties.

These statements have been prepared on a going concern basis, which assumes that the Trust will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future.

The ability of the Trust to continue as a going concern and realize its assets and discharge its liabilities in the normal course of business is dependent upon continued support from related parties and sales of property by the Trust and its equity-accounted investments which impact the Trust's ability to achieve profitable operations in the future. The Trust received a distribution from the sale of property inventory by one of its equity-accounted investments and certain related parties waived their right to repayment of the loans noted in section 15 until end of 2022. Consequently, management is of the opinion that sufficient working capital will be obtained from future cash flows from operations and financing arrangements with its related parties to meet the Trust's liabilities and commitments as they become due.

## 9. CAPITAL RESOURCES

The Trust's capital needs primarily relate to any required maintenance to the properties and servicing mortgage principal payments as they become due. It is management's opinion that sales of property inventory and future related party loans will be sufficient to fund any future capital requirements.

## 10. CAPITAL MANAGEMENT

The Trust defines capital as the aggregate of unitholders' equity. The Trust's objectives in managing capital are to maintain a level of capital that complies with investment and debt restrictions pursuant to the Prospectus, funds its business strategies and builds long-term unitholders' value. The Trust's capital structure is reviewed by the board of trustees of the Trust from time to time.

The Trust's capital structure consisted of the following components at December 31, 2020 and December 31, 2019:

	December 31, 2020	December 31, 2019	Change
Capital			
Unitholders' equity	\$ 7,177,214	\$ 7,680,788	\$ (503,574)
Total capital	\$ 7,177,214	\$ 7,680,788	\$ (503,574)

During the year ended December 31, 2020, the Trust's total capital decreased due to the redemption of 116 trust units (section 5) and the net loss incurred during the year.

## 11. CRITICAL ACCOUNTING ESTIMATES

The preparation of the Trust's consolidated financial statements in accordance with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The Trust's significant accounting policies are described in note 3 to the audited consolidated financial statements for the year ended December 31, 2020.

The policies that are most subject to estimation and judgement are outlined below.

### Cost of sales

The Trust and certain of the Trust's equity-accounted investments hold property inventory and property under development for sale. Cost of sales is determined by management using the net yield method, which requires the use of estimates including costs to complete a project and selling prices of subdivided lots within a project. Management engages a cost consultant to review budgeted costs to complete on a periodic basis and estimates selling prices based on market conditions existing at the reporting date.

### Valuation of property inventory

The net realizable value of property inventory is determined by management, using recognized valuation techniques supported, in certain instances, by independent real estate valuation experts.

The determination of the net realizable value of property inventory requires the use of estimates such as sales prices, development costs and selling costs. These estimates are based on existing and forecasted market conditions.

## 12. FINANCIAL INSTRUMENTS

Financial instruments include cash, cash held in trust, amounts receivable, amounts due from related parties, amounts due to related parties, debentures and accounts payable and accrued liabilities which are carried at amortized cost.

### Fair value of financial instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The following table presents the carrying amounts and fair values of the Trust's financial instruments:

Financial instruments	Fair value hierarchy	December 31, 2020		December 31, 2019	
		Carrying Amount	Fair Value	Carrying Amount	Fair Value
Cash	Level 2	\$ 321,958	\$ 321,958	\$ 2,098	\$ 2,098
Amounts receivable	Level 2	17	17	14,546	14,546
Due from related parties	Level 2	132,253	132,253	104,440	104,440
Accounts payable and accrued liabilities	Level 2	150,306	150,306	190,893	190,893
Due to related parties	Level 2	688,002	688,002	811,308	811,308
Debentures	Level 3	41,514	44,455	4,464	7,000

## 12. FINANCIAL INSTRUMENTS (CONTINUED)

### Fair value of financial instruments (continued)

The valuation techniques and inputs for the Trust's financial instruments are as follows:

#### (i) *Debentures*

The fair value of the debentures is determined by discounting the future contractual cash flow under current financing arrangements at discount rates which represent borrowing rates presently available to the Trust for loans with similar terms and maturity and are measured under level 3 of the fair value hierarchy since the discount rates are either provided by the lenders or are observable on the open market.

#### (ii) *Other financial assets and liabilities*

The carrying values of financial assets and financial liabilities not measured at fair value, including cash, amounts receivable, due from related parties, accounts payable and accrued liabilities and due to related parties, approximate their fair values due to the immediate or short-term maturity of these financial instruments or because they are receivable or payable on demand.

## 13. RISKS AND UNCERTAINTIES

All real estate property investments are subject to a degree of risk and uncertainty. They are affected by various factors including general market conditions and local market circumstances. An example of general market conditions would be the availability of long-term financing, whereas local conditions would relate to factors affecting specific properties in a particular geographic location, such as changes in market lease rates as a result of an over-supply of space or a reduction in demand for real estate.

During the year ended December 31, 2020, the COVID-19 outbreak was declared a pandemic by the World Health Organization. The situation is dynamic and the ultimate duration and magnitude of the impact on the economy and the Trust's business are not known at this time. These impacts could include impairment of equity-accounted investments, impairment of property inventory or potential future decreases in revenue or the profitability of the Trust's ongoing operations. Estimates and assumptions that are most subject to increased uncertainty caused by the COVID-19 pandemic relate to the valuation of property inventories (notes 4 and 5 to the consolidated financial statements for the year ended December 31, 2020). COVID-19 had an impact on the Trust because there was impairment on its property inventory at Garrison Landing due to low market activities and downward pressure on lot value.

The board of trustees of the Trust has the overall responsibility for the establishment and oversight of the Trust's risk management framework. The Trust's risk management policies are established to identify and analyze the risks faced by the Trust, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and in response to the Trust's activities.

In the normal course of business, the Trust, through the Master LP, is exposed to a number of risks that can affect its operating performance. These risks, and the actions taken to manage them, include the following:

#### **Credit risk**

Credit risk is the risk of financial loss to the Trust if a counterparty to a financial instrument fails to meet its contractual obligations. Credit risk arises principally from the Trust's receivables from related parties. The Trust's exposure to credit risk is influenced by the individual characteristics of parties to whom it lends funds. The Trust has mitigated the risk by having officers and directors in common with the parties to whom it has loaned funds as at December 31, 2020.

### 13. RISKS AND UNCERTAINTIES (CONTINUED)

#### Liquidity risk

Liquidity risk is the risk that the Trust will not be able to meet its financial obligations as they fall due. Real estate property investments tend to be relatively illiquid, with the degree of liquidity generally fluctuating in relation to demand for and the perceived desirability of such investments. Such illiquidity may tend to limit the Trust's ability to vary its portfolio promptly in response to changing economic or investment conditions. If the Trust were required to liquidate a real estate property investment, the proceeds to the Trust might be significantly less than the aggregate carrying value of such property.

The Trust's approach to managing liquidity risk is to ensure that it will have sufficient cash available to meet its liabilities when due through property inventory sales or by obtaining related party loans.

The following table provides the future non-discounted scheduled payments of the Trust's financial liabilities, including estimated interest payments:

	2021	2022	2023	2024	2025 & thereafter
Debentures (principal and interest)	\$ 281	\$ 281	\$ 6,721	\$ 139	\$ 37,046
Due to related parties	–	688,022	–	–	–
Accounts payable and accrued liabilities	151,306	–	–	–	–
	\$ 151,587	\$688,303	\$ 6,721	\$ 139	\$ 37,046

#### Income tax risk

*Mutual Fund Trust* – If the Trust does not qualify or ceases to qualify as a “mutual fund trust” under the *Income Tax Act* (Canada) (the “Tax Act”), adverse consequences may arise including that: (i) the Trust may become liable to pay certain additional tax liabilities (with the result that the amount of cash available for distribution by the Trust would be reduced and Trust unitholders may otherwise be adversely affected), and (ii) the Trust units may not be or may cease to be qualified investments for RRSP or similar plans (with the result that a plan, its annuitant, beneficiary thereunder or its holder thereat will generally become subject to additional tax or penalties or may be otherwise adversely affected).

*SIFT Rules* – The Tax Act contains rules regarding the taxation of certain types of publicly listed or traded trusts and partnerships in a manner similar to corporations and which tax certain distributions from such trusts and partnerships as taxable dividends from a taxable Canadian corporation (the “SIFT Rules”). The exposure of the Trust to tax imposed by the SIFT Rules depends in part on whether or not the Trust units, Master LP units or units of any other subsidiary partnerships are listed or traded on a stock exchange or other public market. Where the Trust units, the Master LP units or units of any other subsidiary partnerships are listed or traded on a stock exchange or public market, adverse consequences could arise including that the non-deductible distributions amount or the taxable non-portfolio earnings could be taxable to the Trust, to the Master LP or such subsidiary partnerships, as the case may be (with the result that the amount of cash available for distribution by the Trust would be reduced), and such amount would also, depending on the circumstances, be included in the income of Trust unitholders for purposes of the Tax Act as taxable dividends.

*Changing Tax Laws* – There can be no assurance that income tax laws (or the judicial interpretation thereof or the administrative and assessing practices of Canada Revenue Agency) and/or the treatment of “mutual fund trusts” or SIFTS will not be changed in a manner which would adversely affect the Trust unitholders, including on a retroactive basis.

### **13. RISKS AND UNCERTAINTIES (CONTINUED)**

#### **Interest rate risk**

Interest rate risk arises from the possibility that the value of, or cash flows related to, a financial instrument will fluctuate as a result of changes in market interest rates. The Trust is exposed to interest rate risk from the interest rate differentials between the market rate and the rates used on these financial instruments.

The Trust manages its financial instruments and interest rate risks based on its cash flow needs and with a view to minimizing interest expense.

As at December 31, 2020, the Trust's fixed rate instruments consisted of the debentures, which had a face value of \$41,514 (December 31, 2019 – \$4,464).

#### **Environmental risk**

The Trust, through the Developments LP, WCPG VII LP and its equity-accounted investments, is subject to various provincial and municipal laws relating to the environment. Prior to acquisition, the Trust conducts environmental inspections of its properties and appropriate testing by qualified environmental consultants when required to ensure compliance with all applicable environmental laws.

#### **Redemption risk**

The Trust unitholders are entitled to have their units redeemed at any time on demand. The aggregate redemption price payable by the Trust is subject to limitations. The Trust has mitigated its redemption risk by limiting cash payments to a total of \$100,000 in any quarter or 0.75% of the aggregate subscription price of all Trust units that were issued and outstanding at the start of the twelve-month period ending at the end of that quarter.

During the year ended December 31, 2020, the Trust redeemed 116 units for total consideration of \$71,520 (section 5) which represented 0.58% of the aggregate subscription price of all Trust units that were issued and outstanding as at December 31, 2020 (December 31, 2019 – 106 units for total consideration of \$93,953, which represented 0.75% of all Trust units issued and outstanding as at December 31, 2019). The total consideration paid for redemptions during the year ended December 31, 2020 included the issuance of debentures by the Master LP totaling \$37,000 (December 31, 2019 – \$nil) (section 7).

During the three months ended December 31, 2020, the development segment sold one lot at Garrison Landing for \$95,000 and recorded cost of sales of \$93,481; property taxes of \$10,470; and mortgage interest of \$nil (three months ended December 31, 2019 – sold 1 lot, \$99,500, \$107,187, \$14,049 and \$12,684, respectively). The development segment's share of the loss of its equity-accounted investments was \$10,068 during the three months ended December 31, 2020 (three months ended December 31, 2019 – \$147,139). The decrease in loss was mainly due to no impairment recognized over the property inventories held within the equity-accounted investments while there was a significant impairment in 2019. The decrease in property taxes was due to one lot sale in 2019 and the 13 lot sale in January 2020. The decrease in mortgage interest was primarily due to the mortgage on Garrison being repaid in full in 2019 upon receiving the deposit from the 13 lots sale which occurred in January 2020. The decrease in net loss from equity-accounted investments is primarily due to impairment recognized on the BCR Lands by FSJ Industrial. During the three months ended December 31, 2020, the development segment recognized impairment on its property inventory of \$126,378 (three months ended December 31, 2019 – \$2,331,736). During the three months ended December 31, 2020, the development segment incurred general and administrative expenses of \$24,968, increasing from \$10,057 during the three months ended December 31, 2019 primarily due to higher professional fees for appraisals and corporate entity tax returns. The development segment incurred loss and comprehensive loss of \$170,296 for the three months ended December 31, 2020 (three months ended December 31, 2019 – loss and comprehensive loss of \$2,523,231).

The investment segment's share of the loss from its equity-accounted investment, FSJ Aurora, was \$4,200 for the three months ended December 31, 2020, decreasing from a loss of \$9,143 for the three months ended December 31, 2019 primarily due to a decrease in professional fees. After interest income and general and administrative expenses, the investment segment incurred loss and comprehensive loss of \$7,353 for the three months ended December 31, 2020 (three months ended December 31, 2019 – \$12,209).

During the three months ended December 31, 2020, the Trust segment earned interest income of \$nil and incurred debenture interest of \$220 (three months ended December 31, 2019 – \$55 and \$147, respectively). General and administrative expenses decreased from \$117,196 for the three months ended December 31, 2019 to \$102,839 for the three months ended December 31, 2020 due to lower professional fees. After general and administrative expenses and asset management fees, the Trust segment recognized loss and comprehensive loss of \$135,651 for the three months ended December 31, 2020 (three months ended December 31, 2019 – income and comprehensive loss of \$150,068).

## **17. CURRENT AND FUTURE ACCOUNTING POLICY CHANGES**

### **IFRS 3 Business Combinations**

In October 2018, the IASB issued amendments to IFRS 3, *Business Combinations*, which provide guidance on whether a transaction should be accounted for as a business combination or an asset acquisition. The amendments clarify the minimum requirements for a business, remove the assessment of an entity's ability to replace missing elements, add guidance to help entities assess whether an acquired process is substantive, narrow the definitions of a business and of outputs and introduce an optional fair value concentration test.

The concentration test is a simplified assessment that results in an asset acquisition if substantially all of the fair value of the gross assets is concentrated in a single identifiable asset or a group of similar identifiable assets. As a result of this adoption, the Trust may elect to use the concentration test to assess whether any future properties acquired will be accounted for as business combinations or asset acquisitions.

The amendments to IFRS 3 were effective January 1, 2020. The adoption of the amendments had no impact on the Trust's consolidated financial statements.

### **IAS 8, Accounting Policies, Changes in Accounting Estimates and Errors - Definition of Material**

In October 2018, the IASB issued amendments to IAS 1, *Presentation of Financial Statements* and IAS 8, *Accounting Policies, Changes in Accounting Estimates and Errors - Definition of Material*. Amendments to IAS 1 and IAS 8 align the definition of "material" across the standards and clarify certain aspects of the definition.

The new definition states that information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity.

The amendments to IAS 8 were effective January 1, 2020. The adoption of the amendments to the definition of material did not have a significant impact on the Trust's consolidated financial statements.

### **IAS 1, Presentation of Financial Statements, - Classification of Liabilities as Current or Non-Current**

In January 2020, the IASB issued amendments to paragraphs 69-76 of IAS 1, *Presentation of Financial Statements*, to clarify the requirements for classifying liabilities as current or non-current. The amendments specify that the conditions which exist at the end of a reporting period are those which will be used to determine if a right to defer settlement of a liability exists. The amendments also clarify the situations that are considered a settlement of a liability.

The amendments are effective January 1, 2023, with early adoption permitted. The amendments are to be applied retrospectively. The Trust is currently assessing the impact of this amendment.
